Sharp Depression in Stocks at Teday's Opening.

Railway List Leads in the Losses Downward Movement Caused by Declines in London-The Industrial Quarter Makes a Better Showing. Local Traction Group Neglected.

NEW YORK, June 9 .- The Stock Market opened sharply depressed, particularly for the railway list. Declines extending to ene point were shown in St. Paul, Baltire and Ohio, Louisville and Nashville, and New York Central. Smaller losses were shown in the Pacific stocks and the

the American quarter. Foreign houses were sellers here upon the opening of busi-

The industrial quarter was relatively firmer than the railway list. Tennessee Coal and Iron broke sharply.

American Tobacco and International Paper were comparatively steady.

The local traction group was neglected,

but was fairly firm. After the first half hour's dealings the market developed a firmer tone, and some stocks rallied sharply. The chief influence in the recovery was a break of over 1 cent a bushel in wheat, which was as-cribed both to the failure of the European grain markets to respond to the rise here, and also to reports of refreshing showers throughout the drought-stricken regions.

The conspicuous features of the market were St. Paul, Burlington and Quincy, Louisville and Nashville, Missouri Pacific, and the Atchison shares. The dealings and the fluctuations in all of these stocks were particularly wide. The remainder of the railway list was also weak, but lesser declines appeared there than in the in-stances cited.

The later dealings in the industrial quar-

ter were unusually light and a rather firm tone was noted there.

The week in the Stock Market ended with more interest, if less buoyancy, than it began. After declines on nearly every day and a sharp slump yesterday on the wheat scare in the Northwest, there was an opening this morning a full point or more off in the standard issues, and a general appearance of almost panicky weakness. Later there was some recovery, but not of an enterprising character. weakness. Later there was some recovery, but not of an enterprising character, and the market closed at prices showing tel losses for the day and heavy losses for he week almost everywhere.

The loans increased \$6,000,-000 and caused a decrease in the surplus reserve of \$1,700,000. The statement had little, if any, effect on the market. It is probable that there may be a raily next week, owing to general conditions, and the fact that the present slump has been a manipulated affair almost entirely, which will naturally be followed by a reaction, as the advances have been recently. The market is still professional, almost entirely, but the holders of securities refuse to

Wheat had a great spurt of activity and strength yesterday, advancing ful 2 cents to 72.3-4 and closing at the top price. It was natural that this should have a bad effect on the securities of the grain carrying lines.

This kind of thing usually occurs at this time of year. It is unpleasant for people speculating on slim margins, but should not greatly dissim margins, but should not greatly dis-compose anyone else. There is certain to be good buying of Northern Pacific com-mon on the decline in view of the heavy earnings and very nearly certain bigger dividend to be declared next week. An-other thing that should help these securi-ties generally is the apparently successful efforts of the railway men of the West to efforts of the railway men of the West to get together on a solution of the rate problem. It may be mentioned also re-garding the grangers that the annual re-port of the Rock Island company for the year is attracting much attention, and more as it is studied more.

Briefly put, the Rock Island stateent shows income applicable to dividends for the year of 8.92 per cent as compared with 7.55 last year. To this it should be added that the company expended for maintenance and betterments consider ably more than the usual ratio per mile and per locomotive. If the normal ratio of expenditures in this line be substituted for the actual figures it will be seen that the company in reality showed an earning power during the year of 11 3-8 per cent. The Northern Pacific gross earnings re-port is as follows: Fourth week increase, \$197,404; month increase, \$472,507; from July 1 increase, \$3,603,158.

for Foreign Honors. NEW HAVEN. Conn., June 9.—George force.

Foster Sanford, the former Yale athelete and coach, and at present coach of the Columbia University footbail eleven, has arrived in England. He left New York quietly about ten days ago, making no announcement of his pian to go to Europe at this time, although it was known that he intended to sail in a few weeks.

Sanford will go into training as a sprinter in one of the large English resorts, probably at Brighton, and will work about three weeks before entering the amateur sprinting races.

He will run at the Paris Exposition events later in the season. Sanford will preturn to this city and bring the Columbia Theorem of the past nine. The fact is hardly be too often stated that there appears no reaction or shrinkage in the columbia three weeks?
